

CWORKS FAQ - Technical Queries

11) When I open my work order list, I only can see open work orders, how can I view other work orders?

A: By default CWorks will show all open work orders upon the first view of the work order list. If you want to view all your other work orders, you can click on "VIEW ALL" button it will show you all your remainder work orders.

CWorksSQL

Work Order #	Work Type	Work Status	Location No	Location Description	Problem Description	Requester
